Authorization for this examiner's amendment was given in a telephone interview with Mr. Bret Field on November 3, 1005.

The application has been amended as follows:

Claims 13-20 and 23 are **CANCELLED**.

The following is an examiner's statement of reasons for allowance: The prior art of record, while disclosing nanoporous structures obtained from self-assembling molecules does not teach or fairly suggest a method that includes steps of combining first and second self-assembling molecules under conditions sufficient for said first and second molecules to self-assemble into an ordered composite structure of said first and second molecules held together by non-covalent interactions, wherein said first molecules include a cross-linking functionality that is lacking in said second molecules, and covalently bonding said first molecules via said cross-linking functionality to produce a stabilized composite structure, and (c) separating said second molecules from said stabilized composite structure to produce said nanoporous structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gin et al., and Lau et al., disclose nanoporous materials obtained from self-assembling molecules..
